“Be like a bird, expand your wings, learn new things and fly high as you can...”

Dear All,

Birds are some of the most captivating creatures in the world. A spectrum of vivid colours, from flamingos in pink to peacocks in blue, provides us a visual treat. Even if all of them have feathers, some can fly, some can walk, swim, or run. From the towering ostrich to the tiniest bee humming bird, we have more than 18,000 species of birds. Let's know about our feathered friend.

The New Academic Session 2024-25 will commence from Thursday 04th April 2024. Timings: 08:00a.m. to 01:15p.m.

Bee Humming

● **Bee Humming bird** – Smallest bird in the world with a size of 6cm and weighs around 1.6 grams. They are found in Cuba. They can fly backward and hover on the same place too.

African Grey Parrot

● **Bower Bird** – They have shining body, slightly larger than sparrows and has a unique feature of decorating their body with flowers, feathers, berries, pen caps and papers.

Bower Bird

● **African Grey Parrot** – One of the most intelligent parrots, they can mimic any other animals and can understand the meaning of almost all words.

Flamingos

Albatross

● **Flamingos** – They are bright pink feathered bird and get their body colour from the food they eat. Flamingos nest's are made of mud.

● **Albatross** – They are sea – bird mostly found in the southern hemisphere. These birds have the longest wingspan amongst the birds which is almost 12 feet.

The Swifts

● **The Swifts** – They are one of the fastest flying bird, which can sleep, eat, bath while flying. Swifts rarely touch the ground.
